# AI in Education – Risks & Rewards

AI has the potential to give teachers much-needed assistance in the classroom. It also carries significant risks. California is one of only seven states in the U.S. to issue guidance relating to the use of AI in the classroom. Many educators in California are already using AI tools to help. Read on to learn about specific approaches some educators in California are taking to integrate AI into their learning environments, which comes with stories of both success and caution.

**Many recent surveys "have found teachers use AI as often if not more than students, news that contrasts sharply with headlines about fears of students cheating with AI."**
