

Sample AI Language to Insert in Student Acceptable Use of Technology Policy

Use of Artificial Intelligence

Artificial Intelligence (“AI”) has become increasingly prevalent in many areas, including the education sector. The use of AI can, when used appropriately, enhance student learning by improving the efficiency of education, providing new and creative ways to support learning, and encourage independent research, curiosity, critical thinking, and problem solving. AI has the potential to serve as a supplemental tool to support and expand on classroom instruction, facilitate personalized learning opportunities, and increase educational and learning opportunities.

The District has developed the following guidelines and protocols for the use of AI:

1. Any use of AI in the classroom or on class assignments must align with the teacher’s instructions and use expectations.
2. Any student use on AI on schoolwork must be cited to as any other source and may not be submitted as the student’s original work.
3. Students should not rely on AI tools as a fact-checker to confirm their work or research as AI may not always provide accurate or up-to-date information.
4. Students are prohibited from using any AI system to access, create, or display harmful, deceptive, or inappropriate matter that is threatening, obscene, disruptive, or sexually explicit, or that could be construed as harassment or disparagement of others based on their race/ethnicity, national origin, sex, gender, sexual orientation, age, disability, religion, or political beliefs or interact with the AI in a manner that supports any of the above.
5. Students shall not share confidential information or personally identifiable information with an open AI system of themselves, another student, staff member, or other person. Personally identifiable information includes, but is not limited to, a person’s name, address, email address, telephone number, Social Security number, or other personally identifiable information.
6. Students shall not adjust any privacy settings on an AI tool unless directed to do so by a teacher or staff member.

Students are not permitted to access AI for assistance with assignments or research unless done under the guidance and approval of a District staff member. Unpermitted use of AI may lead to penalties for academic misconduct. Inappropriate use may also result in disciplinary action and/or legal action in accordance with the law and Board Policies.
